

## Modular Mounting Pole

---

The Modular Mounting Pole is a permanent pole solution that provides secure mounting faceplates to mount the Camera's brackets. The system is comprised of two poles as they bolt together with a final Camera height of 13ft (4m) above ground. This system requires a hole dug with a diameter of 20in (50cm) and a depth of 18in (46cm) in which the bottom portion of the Modular Pole system is cemented into the ground with one 80lb (36kg) bag of concrete mix & water.

Final Assembly Height: 13ft (4m)

Material: 2-3/8in Galvanized Pipe

Weight: 14lbs (6kg)

Bottom Pole  
7ft (2m)
