

Universal Pole Mount

The Universal Pole Mount is used for cylindrical poles that don't have a flat surface for mounting the camera system's mounting brackets. Typically the Universal Pole Mount is used on aluminum/fiberglass light poles in parking lots or can be used on any pole that can't be altered by mounting screws used with the mounting brackets. The metal bands on the Universal Pole Mount wrap around the pole with tight pressure which provides a flat surface in which the mounting brackets can be fastened.

Maximum Pole Diameter: 10in (25cm)

Height: 6in (152mm)

Width: 4in (102mm)

Weight: 4lbs (1.8kg)
