

System Accessories

OPTIMIZE YOUR SECURITY

Create the optimal Eye Trax system to suit your specific site needs with our custom accessories.

Motion Sensors

Storage Cases

Installation Accessories

Whether extended motion detection, protection for relocating or storing your cameras or installation accessories, Eye Trax ensures that you get the most from your camera system to keep your security always in sight.

MOTION SENSORS

Remote 1-Way Sensor

Enhance your security camera's motion detection with this additional sensor. Placed within 100 feet (30 m) of the camera, the Remote 1-Way Sensor responds to changes in thermal activity within a 40-foot (12 m) directional range, triggering the camera to transmit image or video clips.

SPECIFICATIONS

Power:
9V battery
(2-yr charge)

Connection:
wireless

Sensor Type:
Infrared (thermal)

Range:
40 ft. (12 m)

Detection Angle:
90°

Remote 4-Way Sensor

Optimize your security camera's motion detection with this additional sensor. Placed within 100 feet (30 m) of the camera, the Remote 4-Way Sensor responds to changes in thermal activity within an 80-foot (24 m) motion detection diameter, triggering the camera to transmit image or video clips.

SPECIFICATIONS

Power:
4 AA batteries
(2-yr charge)

Connection:
wireless

Sensor Type:
Infrared (thermal)

Range:
80 ft. (24 m) diameter

Detection Angle:
360°

STORAGE CASES

Available for all Ranger, Mega and Predator camera models, this durable storage case on wheels is fitted with custom high-density foam to protect your camera system during relocation or storage.

INSTALLATION ACCESSORIES

Barrel Mounting Pole

Designed for the Ranger camera series, the Barrel Mounting Pole is a portable temporary installation solution. Once filled, the 55-gallon (208 L) barrel base can withstand hurricane-force winds while keeping the camera secure at the optimal height for motion detection.

Modular Pole System

Once secured with cement at the desired location, the Modular Pole System serves as a permanent installation solution that keeps the camera at the optimal height for motion detection.

Universal Pole Mount

Ideal for cylindrical poles that lack a flat surface, the Universal Pole Mount provides a convenient solution for mounting Eye Trax cameras.

Solar Panel Extension Wire

This weather-tested 100-foot (30 m) wire easily connects a camera to its solar panel at sites where the panel needs to be placed in a different location in order to receive adequate sun exposure.

Directional Antenna

For areas lacking adequate cellular coverage, the Directional Antenna boosts the cellular signal to increase data speeds for faster retrieval of information from the camera site.
